## Decision Making Math

Go to [http://www.bls.gov/oes/current/oes\\_nat.htm](http://www.bls.gov/oes/current/oes_nat.htm)

You need to locate five different jobs - for each job you need to do the following:

- a. List the job number, name, annual average wage, median hourly wage, and mean hourly wage
- b. You need to click on the job and get the percentages of wages and the income associated with those percentages
- c. address the following questions for each of the five careers
  1. Is this job available in Utah?
  2. What skills are needed to get this job
  3. What type of competition do you expect to face with fellow perspective individuals applying for this career?
